Inquiring General Contractor and/or Home Owner:

Citadel Metal Supply, LLC (CMS) was founded at the tail end of 2015 with a formal opening to contractors and home owners in February of 2016. Since opening we have completed commercial and residential metal roof projects in Texas and New Mexico. We are fully insured and bond-able.

CMS specializes in commercial and residential metal roof systems and wall panels. We have selected sub-contractors who provide proper installation, allowing our customers to experience a complete solution for their metal roofing needs, from roll forming to a finished product.
